CORPORATE TRAINING CATALOG

Build the skills *your business needs.*

A curated guide to workforce capability development

2000+ courses across 70+ domains

Technology. People. Business. Industry.

Turn business priorities into learning priorities

Build the capabilities that move your business forward. Edstellar brings together 2000+ courses across 70+ domains, connecting technology expertise, leadership development and industry knowledge with the needs of your workforce. Develop the skills your teams need to adapt, collaborate and perform with confidence. From emerging technologies and enterprise platforms to governance and operational excellence, explore training aligned with the challenges your organization faces today and the opportunities ahead.

BUILT AROUND YOUR BUSINESS

1

Identify the need

Name the business priority and the roles it affects. Describe the capability gap in practical terms.

2

Shape the learning plan

Select relevant domains and courses. Agree scope, prerequisites and the sequence your teams need.

3

Define success

Set intended workplace outcomes, evidence of progress and a review point with the stakeholders involved.
