01 — ABOUT EDSTELLAR

Building *trusted* data foundations

Edstellar is an enterprise learning partner that helps organizations build future-ready workforces. Our 2,000+ instructor-led programs are delivered onsite or live online by 5,000+ practitioner trainers, and each one is tailored to your goals. This catalog brings together 3 data management and governance programs that span data governance fundamentals, data quality and master data management, metadata management, and governance tooling.

Global leaders including Visa, ABB and Aditya Birla Group trust Edstellar to build capability at enterprise scale. Before any program starts, we look at the real capability gap and the business goal behind it, so every module ties back to outcomes your leaders can measure, not just attendance. The result is data your teams can trust and put to work straight away.
