# Getting *value* from enterprise platforms

Edstellar is an enterprise learning partner that helps organizations build future-ready workforces. Our 2,000+ instructor-led programs are delivered onsite or live online by 5,000+ practitioner trainers, and each one is tailored to your goals. This catalog brings together 14 enterprise applications programs that span ERP end-user and functional training, finance ERP and EPM systems, Dynamics 365 ERP and commerce, Dynamics 365 customer engagement, and HR and supply chain platforms.

Global leaders including Visa, ABB and Aditya Birla Group trust Edstellar to build capability at enterprise scale. Before any program starts, we look at the real capability gap and the business goal behind it, so every module ties back to outcomes your leaders can measure, not just attendance. The result is training your platform teams put to work straight away.
